

AMENDMENTS TO THE DRAWINGS

The attached drawing sheet includes changes to Fig. 4. This sheet replaces the previously submitted drawing. In particular, the vertical axis is changed from 13 to "V", and the angle adjustment means is now labeled as such.

Attachments: 1 Replacement sheet.

REMARKS

Claims 1 to 19 are pending in this application. Claims 1-3 and 5 are rejected. Claims 6-18 are withdrawn from consideration. Claim 19 is newly added herein.

The Objection to the Drawings

The drawings are objected to under 37 CFR 1.84(p)(4) and 37 CFR 1.83(a). In particular the reference character 13 was used to distinguish both the base and vertical line in Fig. 4. This informality has been corrected by changing "13" to "V" as a designator of the vertical axis. A corresponding change is made to the specification.

Also the Office Action indicates that the angle adjusting means 120 must be depicted as a graphical drawing symbol or a labeled box. Fig. 4 is amended to label the rectangular box 120 as an "Angle Adjusting Means."

The Rejections Under Prior Art

Claims 1-3 are rejected under 35 USC §103(a) as being obvious over Rudolf U.S. Patent No. 2,180,837.

Claims 1-3 and 5 are rejected under 35 USC §103(a) as being obvious over Honeycutt et al. U.S. Patent No. 3,717,292.

Claim 1 is amended herein to recite that the support angle of the housing is oblique to the support surface. New claim 19 depends from claim 1 and additionally recites that the actuator includes a piston and cylinder.

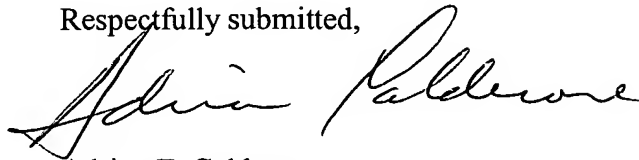

It is respectfully submitted that the amendments overcome the rejections.

Reconsideration and withdrawal of the rejections are respectfully requested.

CONCLUSION

For at least the reasons stated above all of the pending claims are submitted to be in condition for allowance, the same being respectfully requested.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Adrian Calderone", written in a cursive style.
